Use Case Diagram

Use Case Full Description

Use Case Name: User account registration

Use Case ID:	UC-01
Author	Lalaine Andaya
Purpose	Allow users to register in order to book services, and for them to post their services.
Requirement Traceability	PR-01
Priority	High
Preconditions	• System is online
Postconditions	• User must be able to register and login to the system
Actors	• Pet owner
Flow of Actions	Basic Flow 1. Open webapp 2. User is brought to the home page 3. User clicks “<i>Sign Up</i>” button from the homepage. 4. Input required fields (name, email address, contact number, password, etc.) 5. User clicks “<i>Register</i>” 6. System validates input. 7. User will be redirected to the homepage. Alternative Flow <i>Email already in use</i> 1. Open webapp 2. User is brought to the home page 3. User clicks “<i>Sign Up</i>” button from the homepage. 4. Input required fields (name, email address, contact number, password, etc.) 5. User clicks “<i>Register</i>” 6. The user is prompted with a message “<i>The email is already in use. Please try a different email or login here.</i>” 7. The page stays in the sign up page <i>Passwords not matching</i> 1. Open webapp 2. User is brought to the home page 3. User clicks “<i>Sign Up</i>” button from the homepage. 4. Input required fields (name, email address, contact number, password, etc.) 5. User enters mismatched passwords. 6. The system displays the error “<i>Passwords must match.</i>” 7. The page stays in the sign up page

Use Case Name: User Login

Use Case ID:	UC-02
Author	Lalainne Andaya
Purpose	User must be able to login successfully and access the platform.
Requirement Traceability	• PR-02 • PR-10
Priority	High
Preconditions	• User must be registered • System is online
Postconditions	• User must be able to login successfully and be redirected to the homepage.
Actors	• Pet owner • Admin
Flow of Actions	Basic Flow (Pet owner login) 1. Open webapp 2. User is brought to the home page 3. User clicks “<i>Login</i>” button from the homepage. 4. Input username or email and password 5. User clicks “<i>Login</i>” 6. The system validates input and determines user role. 7. User will be redirected to the homepage after successful validation. Alternative Flow <i>Invalid account</i> 8. Open webapp 9. User is brought to the home page 10. User clicks “<i>Login</i>” button from the homepage. 11. Input username or email and password 12. User clicks “<i>Login</i>” 13. The user is prompted with a message “<i>You do not have an account registered. Register here.</i>” 14. The page stays in the login page 15. The user can retry logging in or exit the webapp. <i>Incorrect credentials</i> 1. Open webapp 2. User is brought to the home page 3. User clicks “<i>Login</i>” button from the homepage. 4. Input username or email and password 5. User clicks “<i>Login</i>” 6. The user is prompted with a message “<i>Invalid email or password</i>” 7. The page stays in the login page 8. The user can retry logging in or exit the webapp.

Use Case Name: User (Pet Owner & Administrator) Account Modification

Use Case ID:	UC-03
Author	Atasha Frances Gayle Doria
Purpose	Allow pet owner and administrator to successfully modify their account details.
Requirement Traceability	PR-03
Priority	Medium
Preconditions	• System is online • Pet owners must be logged-in • Administrator must be registered and have pre-registered credentials
Postconditions	• Pet owner successfully modified account details. • Pet owner successfully modified password
Actors	• Pet Owner • Administrator
Flow of Actions	Basic Flow Pet Owner Account Personal Information Modification 1. Open webapp 2. Login to account 3. Pet owner clicks on the “Profile” button in the navigation bar 4. Pet owner clicks on the “Account” button 5. Pet owner is redirected to account page 6. Pet owner clicks “Personal Information” button 7. The system redirects pet owner to Personal Information page 8. Pet owner clicks “Edit” button of the specific information (e.g. name, email address, or phone number) they want to modify 9. Pet owner update a specific personal information 10. Pet owner clicks “Save Changes” to update information 11. The system displays a message: “Are you sure you want to edit your information?” 12. Pet owner clicks “Yes” button to confirm 13. The systems updates pet owner information 14. Pet owner receives a confirmation message 15. Pet owner remains on the Personal Information page Pet Owner Change Password 1. Open webapp 2. Login to account 3. Pet owner clicks on the “Profile” button in the navigation bar 4. Pet owner clicks on the “Account” button 5. Pet owner is redirected to account page 6. Pet owner clicks “Login and Security” button 7. The system redirects pet owner to Login and Security page 8. Pet owner clicks “Change Password” button 9. Pet owner input new password and confirm password 10. Clicks “Change Password”

	11. Pet owner is prompted with a message: “Are you sure you want to change your password?” 12. Pet owner clicks “Yes” to proceed 13. The system validates pet owner input 14. The system processes pet owner changes of password by updating pet owner’s password 15. Pet owner receives a confirmation message 16. Pet owner remains on the Login and Security page Administrator Account Modification 1. Open webapp 2. Administrator is brought to the login page 3. Administrator clicks “Login” button from the homepage 4. Input pre-registered email and password given by the super admin 5. Clicks “Login” button to successfully login 6. The system validates input and determines admin role 7. The system redirects administrator to account modification page to change password 8. Administrator input new password and confirm password 9. Clicks “Change Password” 10. The system validates administrator input 11. The system processes administrator changes of password by updating administrator’s password 12. Administrator receives a confirmation message 13. Administrator will be redirected to admin interface Alternative Flow Pet Owner Account Personal Information Modification 1. Open webapp 2. Login to account 3. Pet owner clicks on the “Profile” button in the navigation bar 4. Pet owner clicks on the “Account” button 5. Pet owner is redirected to account page 6. Pet owner clicks “Personal Information” button 7. The system redirects pet owner to Personal Information page 8. Pet owner clicks “Edit” button of the specific information (e.g. name, email address, or phone number) they want to modify 9. Pet owner update a specific personal information 10. Pet owner clicks “Save Changes” to update information 11. The system displays a message: “Are you sure you want to edit your information?” 12. Pet owner clicks “Yes” button to confirm 13. The system attempts to update account information but fails to update the account information 14. Pet owner is prompted with an error message: "Failed to update your account. Please check your network connection and try again." 15. Pet owner remains on the Personal Information page. 16. Pet owner can then retry editing their personal information.
--	--

Pet Owner Change of Password due to Password Mismatch

1. Open webapp
2. Login to account
3. Pet owner clicks on the "Profile" button in the navigation bar
4. Pet owner clicks on the "Account" button
5. Pet owner is redirected to account page
6. Pet owner clicks "Login and Security" button
7. The system redirects pet owner to Login and Security page
8. Pet owner clicks "Change Password" button
9. Pet owner input new password and confirm password
10. Clicks "Change Password"
11. Pet owner is prompted with a message: "Are you sure you want to change your password?"
12. Pet owner clicks "Yes" to proceed
13. The system validates input, but password does not match
14. Pet owner is prompted with an error message: "Password does not match. Please try again."

Pet Owner Change of Password due to Server Error

1. Open webapp
2. Login to account
3. Pet owner clicks on the "Profile" button in the navigation bar
4. Pet owner clicks on the "Account" button
5. Pet owner is redirected to account page
6. Pet owner clicks "Login and Security" button
7. The system redirects pet owner to Login and Security page
8. Pet owner clicks "Change Password" button
9. Pet owner input new password and confirm password
10. Clicks "Change Password"
11. Pet owner is prompted with a message: "Are you sure you want to change your password?"
12. Pet owner clicks "Yes" to proceed
13. The system validates input
14. The system attempts to update password but fails to update the account password
15. Pet owner is prompted with an error message: "Failed to change your password. Please check your network connection and try again."
16. Pet owner remains on the Login and Security page.
17. Pet owner can then retry changing their password.

Pet Owner Discontinues Change of Password

1. Open webapp
2. Login to account
3. Pet owner clicks on the "Profile" button in the navigation bar
4. Pet owner clicks on the "Account" button
5. Pet owner is redirected to account page
6. Pet owner clicks "Login and Security" button

	7. The system redirects pet owner to Login and Security page 8. Pet owner clicks “Change Password” button 9. Pet owner input new password and confirm password 10. Clicks “Change Password” 11. Pet owner is prompted with a message: “Are you sure you want to change your password?” 12. Pet owner clicks “No” to proceed 13. Pet owner remains on the Login and Security page. Failed Administrator Change of Password due to Password Mismatch 1. Open webapp 2. Administrator is brought to the login page 3. Administrator clicks “Login” button from the homepage 4. Input pre-registered email and password given by the super admin 5. Clicks “Login” button to successfully login 6. The system validates input and determines admin role 7. The system redirects administrator to account modification page to change password 8. Administrator input new password and confirm password 9. Clicks “Change Password” 10. The system validates input, but password does not match 11. Administrator is prompted with an error message: "Password does not match. Please try again." 12. Administrator remains on the account modification page. 13. Administrator can then retry changing their password. Failed Administrator Change of Password due to Server Error 1. Open webapp 2. Administrator is brought to the login page 3. Administrator clicks “Login” button from the homepage 4. Input pre-registered email and password given by the super admin 5. Clicks “Login” button to successfully login 6. The system validates input and determines admin role 7. The system redirects administrator to account modification page to change password 8. Administrator input new password and confirm password 9. Clicks “Change Password” 10. The system validates input 11. The system attempts to update password but fails to update the account password 12. Administrator is prompted with an error message: "Failed to change your password. Please check your network connection and try again." 13. Administrator remains on the account modification page. 14. Administrator can then retry changing their password. Administrator not changing the given password 1. Open webapp 2. Administrator is brought to the login page
--	--

	3. Administrator clicks “Login” button from the homepage 4. Input pre-registered email and password given by the super admin 5. Clicks “Login” button to successfully login 6. The system validates input and determines admin role 7. The system redirects administrator to account modification page to change password 8. Administrator does not change their password 9. Administrator stays at account modification page to change password
