

User Personas

Actual Personas

Pet Owner Profile

- **Name:** Carleen
- **Age:** 20 years old
- **Gender:** Female
- **Pet/s:** Cats and dogs
- **Service/s Availed:** Full Grooming, bath and blow dry, and other pet grooming services
- **Pain Points:**
 - Just describing a haircut to a groomer is not enough. Prefers having the ability to show a picture, so the groomer knows exactly what she wants.
 - Wants a way to check how a specific hairstyle will look on her pet before actually getting the haircut. Not knowing what the result will look like creates hesitation.
 - While neutral about booking grooming appointments, she prefer booking pet hotels in advance. This shows she doesn't like the uncertainty of walk-ins when it comes to leaving her pets overnight.

Pet Grooming Service Provider Profile

- **Business Name:** The Groom Room by Steve
- **Location:** Makati Avenue, Makati City
- **Pain Points:**
 - Admin overhead and risk of scheduling problems caused by managing customer inquiries across Facebook and Instagram while coordinating schedules through google calendar and sheets.
 - Adjusting limited grooming slots while trying to fit in walk-in customers causes scheduling problems, forcing staff to move appointments or turn people away.
 - The shop takes full responsibility for any accidents or injuries involving their staff, which means they must spend extra time manually screening clients and handling safety rules on their own.

- Because there is no centralized platform, they struggle to build instant trust with new clients and want a rating and review system to protect shops from unfair feedback.

Theoretical Personas

PERSONA 1: ANICA

- **Background:** Office worker and dog owner of a 20kg Aspin breed
- **Goals:** Wants to discover reliable grooming services that cater to medium-to-large local dog breeds.
- **Pain Points:** Does not know where to find reliable and quality grooming services and worries about how her dog will be handled by new or unfamiliar pet grooming shops.

PERSONA 2: KENDALL

- **Background:** Retired lawyer who just opened a pet grooming shop. He is not tech-savvy and uses manual booking methods.
- **Goals:** He wants to digitize his shop's operations without dealing with complex software
- **Pain Points:** Manually organizes bookings through chat, SMS text, or a physical notebook which leads to double bookings.

PERSONA 3: LOGAN

- **Background:** Corporate manager and a dog owner of a 7-year-old golden retriever
- **Goals:** Wants efficient communication with groomers, so his dog gets the precise care and styling he prefers.
- **Pain Points:** Finds it difficult to communicate with the pet groomer about his desired haircut for his pet.

PERSONA 4: RAMON

- **Background:** Graduate student and owner of a 3-year-old Persian cat
- **Goals:** Wants an efficient online pet grooming service booking system that he can access during his erratic academic schedule
- **Pain Points:** Frustrated by traditional booking processes that require phone calls or delayed chat replies.

PERSONA 5: BEA

- **Background:** Pet grooming shop owner located in an area with a lot of competitors
- **Goals:** Wants to stand out from neighboring competitors and have loyal customers.
- **Pain Points:** Finds it difficult to sustain loyal customers and lacks tools to encourage client retention.
